

Why ARCs should offer Texecom Monitor

Installers have spoken - Texecom Monitor is the simplest and easiest way of adding primary alarm communications to Premier Elite control systems.

Market-leading position

Texecom has a UK market leading position with commercial signalling systems (30%+).

Texecom installers are preparing to switch to Monitor.

400,000+ Premier Elite systems already have compatible communicators installed.

Simplified ordering process

Installers subscribe to ARCs using Texecom Cloud in advance and add new sites digitally.

Texecom Monitor is built-in, not bolted on. With Premier Elite systems being fully integrated with SmartCom communicators and Texecom Cloud, installations become plug & play.

Managed through Texecom Cloud

Texecom Monitor is setup and configured through an installer's Texecom Cloud account, giving them total control and visibility.

Texecom Cloud mobile provides field installers with all the tools to setup, configure and diagnose connectivity, on the go.

Texecom Monitor offers SP2, SP2 Radio, DP1, DP2, DP3 and DP4 primary alarm signalling

Built-in, Not Bolted On

Designed to meet all your security communication needs, Texecom Monitor simplifies multiple processes whilst offering robust secure communication. Revolutionising alarm communication without disrupting your business.

Seamless & Integrated

- Working in conjunction with industry established and leading ARC's.
- Installers purchase their own hardware.

Secure & Supported

- Designed to comply and exceed EN50136 industry standards.
- Built with trusted and experienced industry partners Telefonica.

Proven & Trusted

- Texecom Monitor is built on the Texecom Cloud platform. A proven, trusted and secure platform used by professional installers.

Secure & Supported

Texecom Monitor is your secure alarm communications provider. Designed from the ground up to feature state-of-the-art cyber security, multi-path and multi-redundancy resiliency, and scalable, expandable, always available cloud system architecture, Texecom Monitor is an alarm signalling solution you can depend on.

Cyber secure

Multi-path, multi redundancy

Always available

Proven & Trusted

Texecom Monitor is built on the Texecom Cloud platform. A proven, trusted and secure platform used by professional installers.

Already servicing hundreds of thousands of ends users and engineers with millions of Texecom Cloud and Texecom Connect logins, Texecom Monitor offers SP2, SP2 Radio, DP1, DP2, DP3 and DP4 primary alarm signalling on a cloud platform you can trust.
